ABOUT ME

"Final-year Computer Science Engineering student at Anna University with hands-on experience building full-stack web applications using Node.js, Express, MongoDB, and React. Completed internships in cybersecurity and AI, bringing a strong foundation in secure coding practices and data-driven thinking. Passionate about building clean, scalable software and actively seeking a software developer role where I can contribute from day one."

EDUCATION

2022 – 2026 (Pursuing)	Bachelor of Engineering(B.E) – Computer Science Engineering Anna University, Tamil Nadu CGPA : 7.78
2020 - 2022	HSC - NATIONAL HIGHER SECONDARY SCHOOL HSC - Percentage : 79%
2019 - 2020	SSLC - ST.JOSEPH'S MATRIC HIGH SCHOOL,MANNARGUDI SSLC - percentage:83%

INTERNSHIP

cyber security	Internship at NERDS LAB Completed a cybersecurity internship, learning to identify and analyze security threats. Helped monitor networks and assess vulnerabilities. Gained hands-on experience with ethical hacking basics.
artificial intelligence	Internship at SAMCORE Completed an artificial intelligence internship, gaining practical experience in machine learning and data analysis. Worked on developing and testing AI models. Learned key concepts in neural networks and AI algorithms.

SKILLS

Languages	- Python, Java, JavaScript, HTML, CSS
Frameworks & libraries	- React.js, Node.js, Express.js
Databases	- MongoDB, MySQL
Tools & platforms	- Git, GitHub, VS Code, Linux, Postman
Concepts	- OOP

CERTIFICATES

JavaScript for Beginners - (Simplilearn)

Demonstrated foundational knowledge in JavaScript programming, variables, functions, loops, and basic web interactivity.

PROJECTS

- **AI-Based Network Threat Detection System · Python, Random Forest, Scikit-learn, Flask, LLM**
 - Trained a Random Forest classifier on network traffic CSV data to detect attack types including DDoS, PortScan, and DoS with multi-class classification
 - Integrated an LLM to auto-generate human-readable explanations for each detected threat — covering cause, risk level, and prevention steps
 - Built an end-to-end pipeline: CSV upload → ML inference → LLM explanation → results dashboard, functioning as a lightweight SOC monitoring tool
- **Smart Todo List · Node.js, Express.js, MongoDB, JWT**
 - Full-stack task manager with JWT authentication, RESTful CRUD API, and real-time UI updates — deployed on Render
 - Supports task filtering by status (completed/pending) and due date with a fully responsive frontend
